Nicolas Mendonca

About Me

I'm a passionate, self-taught 24 yo web developer, located in Buenos Aires, Argentina 🇦🇷 .
Actually, i'm focused on front end technologies, such as:

- React.js
- Redux (redux-thunk & redux-sagas)
- styled-components
- Progressive Web Applications

I'm determined to provide users a great UI. And I'm convinced that this goal can only be achieved with a solid team communication, in order to build a great product.

What i'm working on now...

I am taking part as Ssr Web UI Developer at Intive, building Intelligize. An app for data analysis on public legal documents.

For building solid and scalable products at a fast pace, i believe that testing is the only way to go. That's why over 90% of the code i write is covered by tests. On React.js, i usually write unit tests with

Jest and **Enzyme**.

For UI testing, we use **Storybook** with all the reusable components, hosted on a external monorepo.

Experience

Quality Assurance

Ministry of Education

03/2016 - 07/2017

Test new features built for an the E-Learning platform

Database Admin

Ministry of Education

03/2016 - 07/2017

Build reports, sanitize and manipulate data from the database.
Develop scripts for DB query building.

Back End Developer
